

## What do you like best about Modern Governor?

Here's what some school governors like about Modern Governor, the online e-learning resources designed just for governors.

"I found the course quick and easy to navigate, and because the text was in bite-sized chunks it wasn't off putting. The balance of text and graphics is good, and the font is a good size. I think the links to extra reading is good particularly because you can download it easily for future reference. I also think because it is not too time-consuming; busy governors who often work full time will not find it too onerous." *School Governor, Cumbria*

**"Brilliant use of technology to impart very useful information. Scenarios were excellent"**

*School Governor, Wiltshire*

**"Interactive elements kept up the interest, not too much to read on each page. Links very useful to fill in some of the background etc."**

*School Governor, Hampshire*

"I liked the interactive format and the modular arrangement that meant I could dip in and out as time dictated." *School Governor, Blackburn*

"The scenarios give you time to think through the problem and understand problems that can arise." *School Governor, Reading*

"It's interactive - not just reading." *School Governor, Nottinghamshire*

"I like the links to video and documentation to enhance the subject matter." *School Governor, Cheshire*

"The interactive aspect makes the course easy to follow—and more interesting." *School Governor, Wiltshire*

"The presentation was clear, the language was coherent without being confusing and the interactive side of it was fun." *School Governor, Warwickshire*

"The visual nature of the content was good. The questions as the course progressed helped." *School Governor, Hampshire*

"The interactivity is great for checking you have understood the information." *School Governor, Cheshire*

**"Straightforward and concise summary of the main things I needed to know. I also liked the interactive elements of the course." *School Governor, Learning Trust (Hackney)***
